Experience

2021-10 - 2022-05

Backend Engineer
Mongoose Research, Orchard Park, NY

- Worked on .NET stack for the majority with a legacy applications that dealt in message-queues for transactional text-messaging services (ie Twilio)
- Worked on an analytics API for aforementioned applications
- Worked on helping to minimize **tech debt** by removing overspend and optimizing certain processes.

2021-02 - 2021-10

Back-end .NET Developer
New York State, OGS

- Working on a project called SDVES that uses mostly React for the front-end, and .NET Core for the back-end via microservices hosted in **Azure** .
- Mostly working on integrating federated identity via NYS-hosted Okta instance.

Worked this project as an hourly-basis contract

2020-12 - 2021-10

Senior .NET Software Developer
Ingersoll Rand, Buffalo, NY

- Working with WinForms and AngularJS to migrate a large enterprise-grade system to the web.
- Relies heavily on AWS.

Worked this project as an hourly-basis contract

2012-03 - 2021-10

Senior .NET Software Architect

InnerApps, LLC Dba IDSync, Remote

- Initially, worked on IDSync's Suite of Active Directory synchronization utilities and services.
- Lead the **Security Gateway** project.
- Created a TCP web-socket micro-service that ran behind the firewall of an ISP that allowed an on-premises Windows Service to have AES256 encrypted conversation.
- Lead the IDSync Cloud project.
- "Cloudification" of large portions of the on-premises software into different **Azure** services. Converting **WinForm** UIs to modern web reactive UX&D.
- Using a combination of ASP.NET MVC and VueJS for the new interface.
- Using a plethora of different app-services (Web Apps, Azure Functions, Network managers, Logic Apps, etc) and management routines from Azure to keep the site running well, scaled, and geo-replicated.

Worked from 2012/03 as a full-time employee, switched over to W9 around 2020/07

2016-10 - 2017-05

NET & Web Developer

Dynics, Inc., Ann Arbor, MI

- Developed a custom CMS (content management system) from the ground up in .NET for Warehouse/Assembly-line AV and interactive displays and workstations.

2015-07 - 2016-08

[Part-time] .NET & Mobile Developer

19 Ideas, Buffalo, NY

- Worked with a small team on a slew of different projects.
- Worked on tokenizing authentication routines for an Identity Server in a intranet web-suite.
- Worked on developing an AngularJS w/Cordova based mobile application.

Skill	Rating	Level
NoSQL	■■■■□	Very Good
AWS	■■■■□	Very Good
Docker/Kubernetes	■■■□□	Good
Python [2,3]	■■□□□	Average

2010-08 - 2014-10

CEO, Co-Founder, and Lead-Developer

Provisionists, LLC, Buffalo, NY

- Co-Owner of a Hosting Service Provider (HSP), where the average client needed webmasters to maintain, upgrade, and/or add additional custom functionality at a cost.
- Gained a large portion of experience with Linux-based systems.

2010-11 - 2012-03

.NET Software Developer II

Mueller Services, Inc., Tonawanda, NY

- Developed a handful of 'special projects' on a smaller team.
- Worked on product development tickets in between the random special project, spanning from VB6 tweaks in Access '97 to configuring custom reporting subroutines in bleeding-edge web technologies.

2011-08 - 2012-02

NET & PHP Web Developer

Tranztec Solutions, Inc., Perrysburg, OH

- Worked with the client on getting their internal CSP and Admin Portal (written in .NET) to talk to their CMS front-end (written in PHP).
- Added additional data-logic layers to web-services to improve connectivity between the two systems.

2010-01 - 2010-08

Junior .NET Developer

Logistic Dynamics, Inc., Amherst, NY

- Helped maintain and [eventually] further develop the existing application(s) directly tied to day-to-day operations and procedures.

2004-08 - 2010-08

PHP Developer & System Admin

Titan Network, Remote

- Volunteer as a web and .NET application developer and system administrator for a non-profit fan-site webring.

Set the pace and passion for development early on with .NET and other web technologies. While working with other developers from different walks, building eclectic skills and techniques. **This role started me down this path in life.**

2008-01 - 2009-02

Application Support Specialist

Norman G. Jensen, Inc., Tonawanda, NY

Now Livingston, formerly NGJ Customs Brokers.

- Devised and finalized a series of small to large grade Visual Basic for Application scripts to help expedite day-to-day procedures.
- The finalization of one such script titled "NGJ Entry Assistant" boosted the accuracy of data entry on an average of 20% and output to roughly 50% for participating offices.

2007-06 - 2009-01

Senior Import Administrator

Norman G. Jensen, Inc., Tonawanda, NY

Now Livingston, formerly NGJ Customs Brokers.

- Automated and devised systems to help expedite extremely large volume clients international imports to the US.

2004-11 - 2007-06

Data Entry Analyst

Norman G. Jensen, Inc., Tonawanda, NY

Now Livingston, formerly NGJ Customs Brokers.

- Basic, entry level data-entry position where I was given the opportunity to create my first application that increased my own productivity and accuracy by 200%. Before long management wanted my routines in every data-entry analysts' hands.
